

## HOW TO SET UP YOUR WIRELESS MAC OSX (SAFARI ONLY) ACCESS

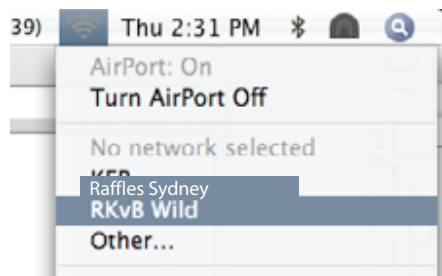

1. Open System Preferences by clicking (top left)
2. Select the "Network" icon
3. Make a new network profile called Raffles Sydney - or whatever you wish
4. Under this profile, select the AirPort settings. Adjust the TCP/IP and Proxies settings as below:

5. Ensure AirPort is on (an icon should be in the top right of the menu bar)

6. Select the Raffles Sydney network (if it does not show up immediately, wait for it to be recognised... otherwise you might be out of range)

7. You will be prompted for your Network Key (password). You will need to enter the password sent to you via email.

### IMPORTANT!

Use SAFARI only for the configuration on this sheet.

To configure other browsers, such as Firefox, set preferences to Manual proxy configuration: HTTP proxy to 10.10.10.200 / port 3128 and TICK "use this proxy server for all protocols" OR set HTTPS to 10.10.10.200 / port 3128
